Tools & Services

As a dedicated data analyst and graphics designer, I believe the right tools are essential for transforming ideas into reality. Here are some of the key platforms I use to deliver powerful insights and stunning visuals :

Data Analysis: I use **Microsoft Excel** for detailed spreadsheet analysis and **Power BI** for creating dynamic, interactive dashboards and visualizations. I'm also consistently expanding my skills in **SQL** to handle more complex datasets.

Graphics Design: My designs are crafted using the **Adobe Creative Suite**, specifically **Photoshop** and **Illustrator**, to create everything from custom graphics to brand assets.
Social Media Management: I have minor experience managing social media campaigns on **Meta**, focusing on content strategy and performance tracking.

My goal is to leverage these tools to help you turn your data into a clear story and your vision into a visual masterpiece.

Power BI Dashboard & Data Visualization Design

Sample Projects

Microsoft Excel Chart design

Dental Clinic Social Media Management & Graphic Design
Client: Local Dental Clinic

Logo & Graphic Design
Client: Chief Sonny's Kitchen – Menu Design
